

RedAlert™

Movement Video Recorder

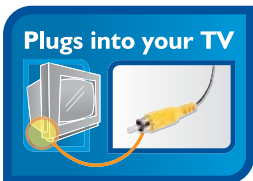

Records movement while you are away or distracted

Exclusive to
 RadioShack®

- Just add a Swann camera (wired or wireless)
- Motion detection triggers recording to catch suspicious activity
- Record AVI video files (10 seconds each) or JPEG still images to built-in 16MB memory or add an SD card (not included)
- A 2GB card can store over 4,000 videos or 28,000 images
- Built-in PIP (Picture In Picture) feature allows you to see 1 wired & 1 wireless camera simultaneously on your monitor
- Built-in 4-channel wireless receiver matches the channels used by Swann wireless cameras and receivers; choose the right channel for best reception
- Easy to connect wireless or wired cameras, records 1 camera at a time
- Portable & discreet for covert surveillance

Use with any  Swann Security cameras†

See your  RadioShack® associate to purchase an SD card with larger memory (up to 2GB)
